

BLU-JET®

AT3000™

All Terrain JetStream
Injection Toolbars

QUALITY DESIGN • PERFORMANCE PROVEN

► For more than four decades, BLU-JET has been an innovative leader in Fertilizer Injection and Conservation Tillage equipment for the agricultural industry. BLU-JET's products are known for their durability, low maintenance, and return on investment in large acre farming operations.

► Each new BLU-JET product is analytically designed, piece by piece, ensuring successful field durability prior to the first prototype being produced. This stringent process makes certain that each BLU-JET product released for commercial sale meets our high standards for quality and reliability.

SubTiller 4™

Conservation Tillage Equipment

AT6020™

Commercial Class Fertilizer
Injection Applicators
